

# FOAMGLAS<sup>®</sup>

## The Brand New FOAMGLAS<sup>®</sup> insulation SPACER System

- ✓ Prefabricated one step solution
- ✓ Non contact insulation system
- ✓ Draining possibilities
- ✓ Prevents CUI
- ✓ Quick and Easy application
- ✓ Compatible with heat tracing
- ✓ Good acoustic properties

AIR GAP

DRAINAGE

- ✓ High temperature silicon spacers
- ✓ High density flexible material
- ✓ Trapezium shaped
- ✓ Factory applied

# FOAMGLAS<sup>®</sup>

## The Brand New FOAMGLAS<sup>®</sup> insulation SPACER System

The FOAMGLAS<sup>®</sup> insulation spacer system has been tested, documented and approved as a solution to prevent and limit the corrosion under insulation.

Creating an air gap between the insulation and pipe creates the opportunity to easily drain out moisture through drain holes.

Another benefit is the possibility to divide the insulation system into compartments to limit the flow of moisture throughout the entire system to just one section which can easily be drained.
